Reflectors and reflective tapes

Sensors that operate according to the reflection principle need high-quality reflectors in order to function. Reflectors for all conceivable applications and environmental conditions are available to ensure an optimum detection result at all times.

Standard reflectors

- Reflectors in various models and mounting types
- For use with sensors with average to large light spot
- Reflective element sizes from 2.3 to 4 mm

Micro-triad-type reflectors

- Micro-triad-type reflectors in various models and mounting types
- For use with sensors with small light spot
- Reflective element sizes from 0.3 to 1.2 mm

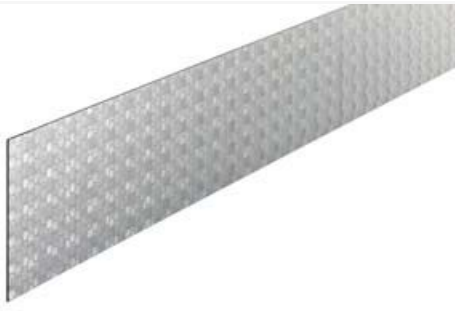

Reflectors with higher resistance

- Special reflectors with chemical resistance in various models and mounting types
- For use with sensors with small to large light spot
- Reflective element sizes from 0.3 to 4 mm

Reflectors with heating

- Reflectors with heating in various models and mounting types
- For use with sensors with average to large light spot
- Reflective element sizes from 2.3 to 4 mm

Reflective tapes for standard applications

- Reflective tapes in various sizes
- For use with sensors with average to large light spot
- Honeycomb-shaped reflective element

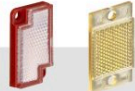

Reflective tapes for laser and clear-glass applications

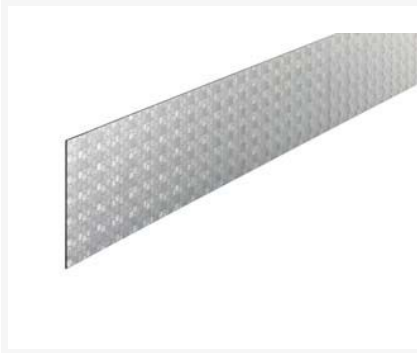

- Reflective tapes in various sizes
- For use with sensors with small light spot
- Direction-dependent attachment

Reflectors

How reliably retro-reflective sensors detect depends on the choice of reflector. We offer reflectors with plastic or stainless steel housings as well as reflective tapes for different requirements: Reflectors in the advanced segment are often used in the food and pharmaceutical industries due to their resistance to cleaning agents. The Solidchem reflectors made of chemically resistant plastic are also characterized by their high temperature resistance.

Reflectors from the Extended segment are suitable for production areas with high humidity or high temperature differences.

	For LED sensors with large light spot	For sensors with small light spot and clear-glass applications	
Advanced segment Ecolab (.P / red) Alcohol & H ₂ O ₂ (.Chem / blue) CleanProof+ (M5 / stainless steel) Solidchem (.SC / gold)	Triple (TKS...) 	Micro-triad (MTKS...) 	Basic REF6 
Extended segment Anti-fog (.AF) UV coating (.UV) Heat-resistant (.HT)			
Standard segment Standard (.,1; .A)
